### **Infinity Engineered Products Introduces SpringRide® Air Springs for Fleets Focused on Reducing Maintenance Costs**

*New SpringRide Products from Global Air Spring Manufacturer Offer Value and Performance*

**Fairlawn, Ohio, October 10, 2024** – Infinity Engineered Products, a leading air spring designer and manufacturer, has announced a new value-driven product offering for today’s hardest working fleets – the SpringRide air spring product line.

Available now at heavy duty parts distributors across North America, the SpringRide air spring product line was designed and tested to meet stringent reliability and performance standards at a value-driven price for fleets focused on uptime and longer service life.

“SpringRide air springs were specifically engineered for one purpose: to offer a reliable, effective solution for companies seeking affordable replacement parts for aging trucks and equipment,” said Sean Manfredonia, Infinity Engineered Products, senior sales manager for the U.S. and Canada. “By delivering application-specific solutions at a lower cost, parts distributors and fleet managers can extend the life of their vehicles without a high price tag.”

Infinity Engineered Products has introduced 22 SpringRide part numbers covering a broad range of popular fleet applications, including hard-working, over-the-road trucks and trailers, fleet vehicles and other severe-use, critical equipment. Each SpringRide air spring features high-strength, lightweight construction that has been application-engineered for full OE-like fit, form and function.

SpringRide air springs are covered by a 1-year warranty, free from defects in material and workmanship.

For full warranty details, please visit [SpringRideAirSprings.com](http://SpringRideAirSprings.com), contact your Infinity Engineered Products sales representative or call [\(877\) 897-3469](tel:877-897-3469).

Infinity Engineered Products also represent a single-source solution for fleet parts providers seeking premium and economy air springs and related components that help to lower cost-per-mile, increase uptime and ensure stronger customer satisfaction and loyalty.
